SKILLS

- Web Development
- JavaScript, TypeScript
- React, Next.js
- Node.js, Fastify, Express
- SQLite, MongoDB
- Git & GitHub
- Docker
- C, C++

LANGUAGES

- English (basic)
- French (Basic)
- Arabic (Fluent)

PROFILE

I specialize in building complete web applications – from clean, responsive frontends with React, Next.js, to powerful backends with Fastify, Express.js, and SQLite or other databases. I enjoy solving real-world problems with scalable and elegant code.

EDUCATION

1337 School 2023- Now

I started my programming journey with the 1337 piscine, a month-long immersion that was both challenging and rewarding. It was during this time that I gained invaluable knowledge, which set the foundation for my future as a developer. After being selected as a student at 1337, I continued to push myself through more complex challenges, gaining over a year of experience. I am constantly evolving, building projects, and growing in the tech field, always eager to face the next challenge.

udemy 2024 - 2025

I finished a full course on web development from Udemy. I learned how to build websites and web apps using tools like HTML, CSS, JavaScript, React, Next.js, Node.js, Express, and MongoDB. I also learned how to create APIs, use authentication, and work with databases.
