AHMED GHOUNAMI

Full-Stack Software Engineer | Software Engineering Student at 42 Paris

Paris, France | +33 7 44 27 03 26 | ahmedghounami0@gmail.com | Portfolio: ahmedghounami.tech

PROFESSIONAL SUMMARY

Full-stack software engineer and 42 Paris student, currently preparing the RNCP Level 7 certification, seeking a work-study (alternance) or internship in the Paris region. Builds complete applications with React, Next.js, TypeScript, Fastify and Express on SQL and NoSQL databases, and also works in C/C++, Docker and Solidity. Completed the intensive peer-to-peer Common Core at 1337 Coding School (42 Network) with 20+ projects. Autonomous, quick to learn, and used to shipping production-ready features under tight deadlines.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, HTML5, CSS3, SQL, Solidity
Frontend: React, Next.js, Redux, Tailwind CSS, Figma
Backend: Node.js, Fastify, Express.js, NestJS, FastAPI, REST APIs, OAuth 2.0, WebSockets, Socket.io
Databases: PostgreSQL, Supabase, MongoDB, SQLite, Redis, MariaDB
DevOps & Tools: Docker, Docker Compose, NGINX, Git, CI-ready pipelines, Jest, Postman, n8n
Blockchain: Smart Contracts, ERC-20/BEP-20, Hardhat, Truffle, Remix, Web3.js, testnets, block explorers

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | TALIO 6 months

- Built scalable web applications with a focus on performance, reliability and user experience.
- Designed and orchestrated complex business-workflow automations with n8n and integrated third-party APIs.
- Delivered production-ready features while gathering requirements and aligning expectations with stakeholders.

PROJECTS

Portify | Portfolio Website Builder | portifyapp.vercel.app Live product

- Built and deployed a web app (Next.js, Vercel) that lets users create a portfolio site from 12 animated, responsive templates.
- Implemented a live editor with real-time preview, CV import from PDF/Word, one-click publishing on a shareable link, and export of a standalone Next.js source project.

Real-Time Multiplayer Gaming Platform | Next.js, Fastify, SQLite3

- Developed a full-stack multiplayer ping-pong platform with real-time gameplay sync, matchmaking, tournaments, live chat, authentication, player profiles and stats.

Real-Time Multiplayer Puzzle Game | React, Redux, Node.js, Socket.io, Jest

- Built a networked multiplayer puzzle game with synchronized piece sequences, room-based sessions via dynamic URLs, live opponent views and functional-programming client logic.
- Reached 70%+ unit-test coverage with Jest as part of a CI-ready pipeline.

Video Streaming Platform | Full-stack, BitTorrent, OAuth 2.0

- Developed a platform to search and stream legally distributable content via the BitTorrent protocol, with authentication, multilingual profiles, advanced search and filtering, subtitles and a secured OAuth 2.0 REST API.

Containerized Web Infrastructure | Docker Compose, NGINX, MariaDB, Redis

- Designed and deployed a multi-container, production-style stack (NGINX, WordPress/PHP-FPM, MariaDB, Redis, Adminer) with isolated networking, persistent storage and TLS 1.2/1.3 HTTPS.

HTTP/1.1 Web Server | C++98, poll()

- Built an HTTP/1.1 server from scratch with non-blocking I/O, GET/POST/DELETE, configuration-file parsing, CGI execution, sessions, cookies, custom error pages and file uploads.

Custom BEP-20 Token | Solidity, Hardhat, Remix, BNB Chain testnet

- Designed, developed and deployed a BEP-20 smart contract with ownership and privilege security controls, verified and published on a block explorer, with full technical documentation.

EDUCATION

42 Paris (42 Network) | Software Engineering Oct 2026 – Present

- Continuing the software engineering curriculum; currently in progress toward the RNCP Level 7 certification.

1337 Coding School – UM6P (42 Network) | Common Core 2023 – 2026

- Completed 20+ hands-on projects: full-stack web, mobile, systems programming, networking, Docker infrastructure, machine learning and algorithms, all validated through peer-to-peer code reviews.
- Coursework: Full-Stack Web Development, Containerization, OOP, Databases, Data Structures & Algorithms, Operating Systems, Network Programming & Administration.

LANGUAGES

Arabic (fluent) | English (fluent) | French (beginner, improving)
